## SUMMARY

At Google, my team and I are elevating the user experience for millions by emphasizing accessibility and developing robust quantitative user research infrastructure. Leading the Ads Central UX Engineering teams, I align our strategies with the organization's overarching goals, fostering an environment where clear communication and strategic roadmapping drive innovation.

## EXPERIENCE

### Google

11/2020 - Present

### Manager II, UX Engineering

- Set and communicate team priorities that support the broader organization's goals. Align strategy, processes, and decision-making across teams.
- Set clear expectations with individuals based on their level and role. Meet regularly with individuals to discuss performance and development and provide feedback and coaching.
- Oversee systems designs within the scope of the broader area, and review product or system development code to solve ambiguous problems.
- Develop the technical outlook and roadmap. Evolve the roadmap to meet anticipated future requirements and infrastructure needs.
- Review code developed by engineers and provide feedback to ensure best practices (e.g., style guidelines, checking code in, accuracy, testability, and efficiency).

### LinkedIn

04/2015 - 11/2020

### Staff Software Engineer

- Own the front-end development for one or more of LinkedIn products lead key tracks/ teams and mentor team members, collaborate with visual/interaction designers, other engineers, and product managers to launch new products, iterate on existing features, and build a world-class user experience. Make the site delightful, secure, performant and accessible to all our members. Implement cutting-edge technologies and write state-of-the-art code to keep LinkedIn at the cutting edge of current technology.

### Sapient Global Markets

09/2012 - 04/2015
